

lab08

```
$ gcc lab08.c
lab08.c:33:22: warning: data argument not used by format string [-Wformat-extra-args]
]
    printf("input B: ", B);           // prompt to input an integer
        ~~~~~^
1 warning generated.
```

```
$ a.out
input A: 100
input B: 225
A = 2^2 * 5^2 = 100
B = 3^2 * 5^2 = 225
GCD(A, B) = 5^2 = 25
LCM(A, B) = 2^2 * 3^2 * 5^2 = 900
```

score: 93.0

- o. [Output] Program output is correct, good.
- o. [Compiler] warnings should be eliminated.
- o. [GCD] can be more efficient.
