## Homework No. 4

## Due 10:10 am, May 1, 2007

3.50 Use the defining equation for the Fourier series coefficients to evaluate the Fourier series representation of the following signals:

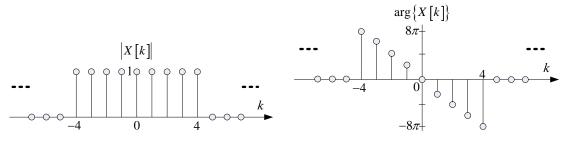

(a) 
$$x(t) = \sin(3\pi t) + \cos(4\pi t)$$
 (10%)

(b) 
$$x(t) = \sum_{m=-\infty}^{\infty} \delta(t - m/3) + \delta(t - 2m/3)$$
 (10%)

3.51 Use the definition of the Fourier series to determine the time-domain signals represented by the following Fourier series coefficients:

(a) 
$$X[k] = j\delta[k-1] - j\delta[k+1] + \delta[k-3] + \delta[k+3], \quad \omega_0 = 2\pi$$
 (10%)

(e) X[k] as depicted in Figure P3.51(b) of the textbook,  $\omega_0 = 2\pi$  (10%) (Fig. P3.51 is also drawn as the follows.)

3.54 Use the defining equation for the Fourier transform to evaluate the frequency-domain representations of the following signals:

(a) 
$$x(t) = e^{-2t}u(t-3)$$
 (10%)

(b) 
$$x(t) = e^{-4|t|}$$
 (10%)

3.67 Find the frequency response and impulse response of the systems having the output y(t) for the input x(t):

(a) 
$$x(t) = e^{-t}u(t), \quad y(t) = e^{-2t}u(t) + e^{-3t}u(t)$$
 (10%)

(c) 
$$x(t) = e^{-2t}u(t), \quad y(t) = 2te^{-2t}u(t)$$
 (10%)

3.77 For the Fourier transform  $X(\omega)$  shown in Figure P3.77 of the textbook, evaluate the following quantities without explicitly computing x(t): (Fig. P3.77 is also drawn as follows.)

| 找關係即可   |      | $\bigvee$          |      |
|---|------|--------------------|------|
| (c) $\int_{-\infty}^{\infty} x(t) e^{j3t} dt$ | (4%) |                    |      |
| (b) $\int_{-\infty}^{\infty}  x(t) ^2 dt$     | (4%) | (e) $x(0)$         | (4%) |
| (a) $\int_{-\infty}^{\infty} x(t) dt$         | (4%) | (d) $\arg\{x(t)\}$ | (4%) |
