National Tsing Hua University

Stopwatches

- ## Two states
  - 'Stop' (initial state) and 'Start'
- ## The 'lap' function is only meaningful at 'Start' state
  - A register for 'lap' function
    - Not lap: Display down-counting number
    - Lap: Display the very number when pressed but still down-counting in background
- ## The 'reset' function is only meaningful at 'Stop' state
- ## De-Skew and one-pulse circuits

Timers

- ## When 'Setting'

  – One-pulse?

  – Accelerating the number setting?

- ## When operation

  – Three states

    - 'Start', 'Stop'(the time goes to 0), 'Pause' (the time remains when pressed)
